

# **Environmental Policy**

**The Campus and its Partners are committed to promoting sustainability and improving environmental performance**

As a facility the Campus staff will think about everything we do and the effect it has on the environment.

We will set a high standard and aim to gain recognition for effectively managing and improving our environmental impact.

We will do this by ensuring that we:

- All think about the environment when making day to day decisions at work and at home
- Promote good practice to our customers and encourage them to work with us. For example, by using the Greener Events Guide
- Support school partners in achieving Eco-Schools status
- Consider the environment when planning new projects
- Prepare and implement an environmental management action plan as part of an Environmental Management System.
- Ensure our building minimises its environmental impact
- Maintain and improve the way in which we manage our waste
- Always use resources efficiently and effectively
- Reduce Pollution – particularly air pollution
- Measure and Reduce the building's CO2 Emissions
- Comply with all relevant environmental legislation and other requirements
- Monitor, report and review our progress regularly
